# Spiritual Thoughts For Your Spiritual Walk

*Bible Studies with Emanuel White, Sr.*

A serene landscape featuring a calm pond in the foreground, bordered by tall, golden-brown grasses. The middle ground is filled with dense, vibrant autumn foliage in shades of yellow, orange, and green. In the background, several tall, dark evergreen trees stand prominently against a bright sky. The overall scene is peaceful and evokes a sense of natural beauty and tranquility.

# May is... Mental Health Awareness Month

A mental illness is a condition that affects a person's thinking, feeling, behavior or mood. These conditions deeply impact day-to-day living and may also affect the ability to relate to others.

If you have — or think you might have — a mental illness, the first thing you must know is that you are not alone. Mental health conditions are far more common than you think, mainly because people don't like to, or are scared to, talk about them.

- [1 in 5](#) U.S. adults experience mental illness each year
- [1 in 20](#) U.S. adults experience serious mental illness each year
- [1 in 6](#) U.S. youth aged 6-17 experience a mental health disorder each year
- [50%](#) of all lifetime mental illness begins by age 14, and 75% by age 24

A mental health condition isn't the result of one event. Research suggests multiple, linking causes. Genetics, environment and lifestyle influence whether someone develops a mental health condition. A stressful job or home life makes some people more susceptible, as do traumatic life events. Biochemical processes and circuits and basic brain structure may play a role, too.
