Celiac Disease

Celiac disease is an autoimmune disease that's triggered by consuming gluten and results in damage to the small intestine. Gluten is a protein naturally found in some grains including wheat, barley, and rye. It acts like a binder, holding food together and adding a “stretchy” quality.

When a person with celiac disease eats gluten, the immune system sees gluten as a threat and mounts an attack. However, it ends up damaging the villi of the intestines, which help to digest food. Damaged villi make it nearly impossible for the body to absorb nutrients, leading to malnourishment and a host of other issues.

Celiac disease is identified with a blood test. If the results are positive for celiac disease, patients usually undergo an upper endoscopy with biopsies as well. An upper endoscopy with biopsies is the gold standard for diagnosing celiac disease.

Currently, the only celiac disease treatment is a strict, lifelong gluten-free diet. A gluten-free diet means avoiding all foods that contain wheat, rye, and barley in all forms.

Distribution of Food to the Community

- Family Life Ministry and the FHCOC Food Pantry have partnered with Tarrant Area Food Bank and will be distributing food to the community **every 3rd Monday of each month beginning July 17th.**
- Prior to this grand event we will have SNAP (Supplemental Nutrition Assistance Program) representatives here at the building assisting people in applying for the SNAP benefits. **Monday, June 5** will be our kickoff date followed by Monday, **June 19**, and Monday, **July 10th from 10 am until 2 pm.** These services are provided to anyone who is in need. Please spread the word and keep all things in prayer.
- We also need **volunteers starting Monday July 17th** to help make the food pantry a success. We will have a sign-up sheet well in advance prior to our first distribution date for those who are interested. And we want to thank you in advance for volunteering and ask that you pray that God bless our hearts and hands as we do a good work.
