Did you
know?
March is
Endometriosis
Awareness Month.

What is Endometriosis?

- A condition where tissue similar to the lining of the uterus grows in other places in the body.*
- It is one of the most common gynecological diseases, and its primary symptoms include pain and infertility.*
- Endometriosis may affect more than 11% of American women between 15 and 44.*
- Endometriosis can develop in any girl or woman who has menstrual periods but is especially common among women in their 30s and 40s and may make it harder to get pregnant.*
- Endometriosis growths are benign (not cancerous).*
- Endometriosis growths may swell and bleed in the same way the lining inside of your uterus does every month—during your menstrual period.*
