**Did you
know?
February is
American
Heart
Month.**

**Brought to you by:
FHCOC Care Team
Ministry**

Take action to protect your heart by following these tips:

Maintain a Healthy Weight Maintaining a healthy weight is important for overall health and can help you prevent and control many diseases and conditions.

- Choose healthy snacks like fruits, vegetables, yogurt, or nuts, instead of sugary or high-calorie snacks.
- Stay hydrated with water as your primary beverage.
- Aim for at least 150 minutes of moderate-intensity aerobic exercise (such as brisk walking) or 75 minutes of vigorous intensity (like running) exercise per week.
- Consider keeping a log of what you eat throughout the day.

Be More Active Getting enough physical activity helps to lower your risk of heart disease and stroke.

- Adults should spend at least 150 minutes (2 ½ hours) each week doing physical activity.
- Sit less! Take the stairs. Park farther away. March in place or take a walk around the block.
- Try muscle-strengthening activities like lifting weights, working with resistance bands, doing sit-ups and pushups, or some forms of yoga—whatever works for you.
- If you don't have a lot of time in your day, try being active for 10 minutes at a time. Anything that gets your heart beating faster counts!
